

You will need:

- Scissors
- Pencil
- Semi-thick fabric – I use what’s called “Blackout Fabric” which is the same stuff on the back of curtains to make the room darker, but canvas or any other thicker fabric will work.
- Thin BBQ Skewers – You can also get these from Dollarama.
- String Thicker than Thread – You can get this at Dollarama as well.
- Hot glue gun – you can get a small one from Dollarama that should come with a couple of glue sticks.
- Poster Board or other thick paper or cardboard cut into a 4 inch in diameter circle.

Preparation Instructions:

- Print this page. Printer settings should be on “Fit to Page”.
- Cut out the template and trace onto your fabric – Cut out fabric.
- Cut the skewers in half or to 6 inches in length (which is about half)
- Cut the string to about 10 inches.

NOTE:

- The measurements on the tipi template are for those who don’t have a printer.
